#### Raising Poultry for the Market.

Raising poultry for the market can be made quite a profitable business if properly managed. By faulty management the profit can be made very small or be made to disappear entirely. In raising chickens for market it makes a great difference whether they attain a good size and are sent in early in the season when poultry is scarce and high, or are marketed late when there is plenty of and the girl at the central says: 'Hello, poultry offered at low prices. The prices of chickens in August and September are usually fifty to one hundred per cent. higher than they are in October and November. By having the chickens hatched early in the spring they may easily be made ready for the market early and then secure the high prices which prevail during the latter part of summer and first part of autumn.

In order to succeed in raising poultry extensively, plenty of room must be provided for it. There must be suitable shelter, and plenty of yard room. The yard should be large enough so that a large part of the ground can be kept in dyke, giving the crank a vicious twist grass, to afford the poultry a supply of and glaring into the enunciator with a green food. They need a daily supply of green vegetables. Cabbage and lettuce are best, but young and tender grass is good. Shade is needful in the ful prognostication, Mr. Spoopendyke yard to afford the birds a chance to retreat from the hot rays of the sun in summer. Fruit trees may advantageously be placed in the yard. They will afford the needed shade, and the presence of the fowls will help to proteet the trees from insects and insure their thriftiness and fruitfulness. Poultry be. "I don't suppose she's there at all. yards are generally too small. If the More likely she's gadding around someyard is large enough the fowis will keep healthy. A New York hotel-keeper a few years ago had a poultry yard which contained fifteen acres, in which he kept large numbers of turkeys, ducks and ing out with the conversational smallfowls. They had the range of the lot and during the summer obtained a large part of their food from the yard, and and you made me lose her? I tell you were free from diseases usually incident one thing," added Mr. Spoopendyke to poultry. The owner was wont to de- with impressive solemnity, "if you don't clare that he could raise a thousand pounds of poultry as easily and as moths will get in there and make you cheaply as he could a thousand pounds of beef, mutton or pork. Under good management it is probably true that a thousand pounds of poultry can be produced as cheaply as a thousand pounds 'You'll have no trouble with her if she's of beef, mutton or pork. The fact that got started." poultry usually sells at two or three

them to insure their rapid and continumeal or oat meal or bread made of gasted steam dictionary?"
these articles. The chickens should be "Say, dear, can I talk through it?" given about all the food they will eat so | cooed Mrs. Spoopendyke, anxious to as to keep them growing thriftily, all disarm her husband. the time. Many allow their young "Is there anything poultry can be grown ready for market, ached. the cheaper can it be produced. A certain amount of food daily is required to supply the waste of the system, maintain animal heat and so forth, and what | home and she's waiting for him." is consumed in excess of that amount increases growth and flesh. If a flock shrieked Mr. Spoopendyke, glaring at of chickens can be brought to maturity his wife. "It took you to get hold of ready for the market in four months | it? When I call that girl she goes home alive or simply maintaining their condition for two months will be saved. The more the chickens can be made to eat and digest the faster they will grow and the less will be the cost of maturing | wire through Specklewottle, turns on them. Neglect to feed generously is the current and slams him right up the cause of many failures in raising here through the side of the house? poultry for the market. The greatest profit is obtained only by feeding all the she don't break her back trying to make birds can eat, while the least profit is obtained by keeping them about half starved. Generous feeding and profit go together and that fact should be sufficient inducement to secure good treatment of poultry .- Practical Farmer.

# A Tableau.

M. Gaulthier de Rumilly, Dean of the Senate, received a visit a few days ago the only comprehensive brain that ever from his landlord. It was a question of tackled it for? You've got it! With repairs to be made, and the Senator explained what he wanted to have done. The proprietor listened attentively and promised to have everything done. Six o'clock struck.

"Six o'clock already," said the landlord.

"Exactly," replied M. de Rumilly; "but that doesn't matter, for I hope you will do me the honor of dining with "You are very kind," replied the

landlord, "but-"I insist; I shall not let you leave at this hour; your plate is already laid."

"It is impossible." "I shall be angry."
"It is impossible, notwithstanding the desire I have to remain. My affairs call

me elsewhere at precisely this nour."
"You do not wish to share my dinner?" said the Senator, slightly vexed. "You will understand why. They dine at M. de Rothschild's at seven

"Ah, you are his guest!"
"No, I am his cook!" Tableau. - Paris Paper.

The tables were appropriately decorated when the Boston Commercial Club gave a dinner to some railroad The central piece represented a complete train, with engine and tender two feet high, made entirely of roses, pinks, violets, and other flowers. It extended nearly half across the President's table. The guests, as a return compliment, invited the club to a trip through the White Mountains .- Boston Post.

#### Mr. Spoopendyke's Call by Telephone Upon a Business Friend.

"Now, my dear," said Mr. Spoopendyke, standing before the telephone and eparing to explain its mysteries and advantages to his wife. "Now, my dear, soups and gravies. this is going to prove the most convenient thing we ever had in the house. When I want to talk to any one, I just turn this crank and say: 'Hello, hello!' hello!' and I tell her who I want, and she calls him up. Now, I'll ask for Mr. Specklewottle." And Mr. Spoopendyke turned the crank, utterly forgetting to press the button that makes the con-

"What does he say?" asked Mrs. Spoopendyke, cocking her head to one side, as a woman always does when her husband is trying to listen.

"He don't say anything yet," growled Mr. Spoopendyke. "He ain't like you. He waits until he has got something important on his mind, and then he says Hello, hello!" roared Mr. Spoopenvindictive look. "Now you keep that mouth of yours tied up, or you're liable to lose it some day!" with which dolerattled away at the crank, and awaited some sign of life at the other end.

"I suppose it is really that girl's fault," murmured Mrs. Spoopendyke, sniffing at the instrument as though she smelled the young lady from afar, and found her no better than she ought to

"What d'ye want to talk just then for?" howled Mr. Spoopendyke. "What's your measly object in breakpox at that critical juncture? Don't vou know she was just beginning to talk, shut your mouth once in a while the trouble."

"If she'd only just commenced to talk, you haven't lost her," replied Mrs. Spoopendyke, wrinkling her nose.

"Hello! hello! call up Mr. Speckletimes the price of beef, mutton or pork, wottle!" bawled Mr. Spoopendyke, apsufficiently indicates how much "greater parently convinced by his wife's manthe profit must be in poultry raising than in raising beef, mutton or pork. | parently convinced by his wife's manner or his own experience. "There, she's gone. No use for me to try any she's gone. No use for me to try any-In raising poultry for the market the thing when you're around. Another importance of having the chickens time I want to talk through a telephone hatched early should be insisted upon. I'll take it over in a vacant lot! Do Next in importance is the feeding of you know of anything that will keep you quiet for a moment?" demanded Mr. ous growth. Just name the ardant in quantity. Skimmed milk, either | ticle! Why didn't you tell me, when sweet or sour, is an excellent article to you referred me to your measly old dad, feed young chicks, along with Indian | that I was proposing marriage to a dod-

"Is there anything you can't talk chickens to be only about half fed for through?" squealed Mr. Spoopendyke, the first three or four months and then beginning to realize that there was by extra feeding endeavor to bring something about the telephone that he them into condition for the market. By did not thoroughly understand, "When feeding well from the first the chickens I get a telephone for you, the diaphragm are hastened to maturity, kept in good | will be of doubled and twisted wrought at an early age. If poultry can be I don't believe that will last more'n an brought to maturity early in the season and sent to market when there is a scarcity of poultry offered, a high price dod-gast ye!" and Mr. Spoopendyke will be obtained for it. The quicker rattled away at the crank until his arm

> "Be patient, dear. You said she'd gone, and it's a long way around to Mr. Specklewottle's house. Perhaps he isn't

instead of six, the cost of keeping them to dinner, and along in the evening she capacity what they have, grasp after goes around to Specklewottle's house and brings him here in a hack! That too often decreasing the profit, with your idea of it? Or p'raps you've got sometimes loss of the land in the end, some sort of notion that she runs the which is usually a relief. If you menthe current and slams him right up a dod-gasted idiot of herself, like some women!"

"I think I understand how it works," faltered Mrs. Spoopendyke. "You say, 'Yellow, yellow-!'

"There's the combination!" yielded Mr. Spoopendyke "You got your work in that time! Why didn't you tell me I was bringing this thing home to the inventor! What'd you want to let me stand up here and explain this thing to what you know now and what you've got to find out, you only need a wig and a law suit to be the whole science of electricity. I tell ye this is the way it a valuable aid here as in everything works!" and Mr. Spoopendyke brought the box a kick that splintered it. "See it work?" he demanded, pulling at the wires until they cut his hands. "Watch it, while I convey your regards to the other lunatics!" and he danced on the remnants of the instrument and smashed

the fragments against the wall. "Never mind, dear," remonstrated Mrs. Spoopendyke, puttering around after him and trying to soothe him. "When we want Mr. Specklewottle again, we'll just send a servant around after him. That'll be much nicer than trusting to a nasty wire, and I know there interest and the risks which accompany was a draught through that box for I overgrown crops. Less manure might, could feel it as soon as I came in this on the whole, have grown as good crops room.

"Oh, you could feel it!" roared Mr. Spoopendyke, rather wondering how use manure enough to grow full crops, he was going to account to the com- or such as will secure the most advantpany for the destruction of his box. "If I had your sensitiveness and an onion, there will always be enough manure left I'd hire out as a dod-gasted orchid!" and with this culminating sarcasm, Mr. may not need additional fertility to Spoopendyke crushed his hat over his grow it, depending upon what is grown, ears and rushed around to Mr. Specklewottle's to see what had better be done to some extent of a changed character; about the matter.

"I don't care," murmured Mrs Spoopendyke, as she flopped down on the greatest profit, all things considered, the floor to pick up the pieces of the may be realized. What is more than wrecked telephone box; "he'll not have this is a waste, to some extent, of any opportunity for standing up here manure; what is less is a lack and imand talking to that girl until his legs are plies waste in land .- F. G., in Country tired," and with this sage expression of her satisfaction over the result of the experiment, Mrs. Spoopendyke broke off the ends of the bent wires and laid

#### HOME AND FARM.

-Celery vinegar is made by soaking one ounce of celery seed in half a pint of vinegar (white wine or good cider vinegar). This is much used to flavor

-Dust the breeding hens occasionally with sulphur. Grease the heads of newly fledged chicks with a very little lard. In preparing the nest for a setting hen always sprinkle the eggs with sulphur .- N. Y. Heraid.

-To make fine coffee, retaining all of its aromatic qualities, have a coffee pot containing the desired quantity of boiling water, into which plunge the it infuse therein for not less than fifteen or thirty minutes, the pot standing in a hot situation, but not allowed to boil. -The Caterer.

-Save the buckwheat chaff, says a correspondent of the Husbandman, and use it as an absorbent in the cow stable. Being fine and dry it makes one of the best absorbents for this purpose. He finds a corn basket full (one and a from ten cows over night and keep them dry and clean. He has made a practice of saving all of his own and buying of his neighbors for one dollar per load of fifty baskets, and it pays well.

-It is usual to sow about about a peck of clover seed to the acre when the ground is in fine, smooth, mellow condition to receive it. Rather less is required for white clover. Sow very early and in memory of the time when she in spring, or as soon as the ground is in mellow condition at the surface. A very light brushing, covering it half an inch deep, or less, will make the crop more certain. Red clover is a valuable crop in farming; white clover is chiefly used for lawns, or for pasturage in certain cases .- Country Gentleman.

-Prof. McBride tells how to administer medicine to swine. Take your pig, "halter him as you would for execution and tie the rope end to a stake. He will pull back until the rope is tightly strained. When he has ceased his uproar and begins to reflect, approach him, and between the back part of the jaws insert an old shoe from which you at once begin to suck and chew. swallow any quantity you please."

-In the spring, when parasitic pests. common bar or soft soap, heat with a animals with the suds. Continue to til the enemy is conquered. The preparation will not take off the hair, but it will drive off or kill all insects, and cure mange or other skin diseases. - Chicago

### Waste in Land.

More than half of the land in occupation is waste. If I raise eighty bushels of corn per acre, and my neighbor raises but forty, although my neighbor may think he does well—which he does, and better than is commonly done-yet it requires double the amount of land to equal my yield. This is a loss of interest and taxes on half of my neighbor's land, or virtually so much waste land. The difficulty is, his land is half fed. It therefore can do but half the work. But usually land does much less than this, and can be made to do more than in the other case. This shows what an enormous waste there is. Really, over twothirds of our land is idle, the interest, taxes and repairs lost, and this loss a constant drain. And yet this is not the worst; farmers, instead of disposing of some of their land, or working to its full more, thus increasing the waste, and tion improvement to them they know it all, and will even assume to instruct you, assuring you that some land is "too poor to do anything with," and pleading a lack of manure, or the too great cost of enriching the land with purchased manures. And yet it may be that round about them are those who never lack for manure, growing large and profitable crops, on land originally as poor as the land they complain of.

Good tillage and home-made manure

are the most successful means of raising full and profitable crops. The management must be to prevent not only waste in the land, but in labor, in manure, and in many other ways that may seem small, but in the aggregate amount to much. This must be done, as the average profit per bushel or pound of produce is necessarily small. Economy is else, and the farmer can not well practice it too much. Besides, he must have knowledge and experience, not only in a general way, but as directly applied to his own land. He may grow large crops—the largest, if you please—that will cost more than they are worth, as is often the case with premium crops, or with corn grown from the silo, or particularly where commercial fertilizers are used. The ground, very highly and deeply enriched, will lose some of its manure before it can be appropriated, taking years to do it, with loss of the with less loss. The best way is-and this experience must largely decide-to age, all things considered, in which case in the soil to favor the next crop, which some crops requiring less manure, and but there should always be enough to tax the full capacity of the soil, so that Gentleman.

-Mr. Abraham Hendrickson, residing in Westport, N. Y., has a powder horn on which is carved a coat of arms with the date 1746.

#### Patti and the President.

The President invited Patti to the White House and at the same time invited a number of friends to hear her sing, and got a very cool note from the diva declining the honor.

What must the President do when he wants to honor a singer in this way? and probably ninety-nine out of every hundred singers would be as glad to sing before the President as Patti has been before now to sing before the Czar. He dare not offer the singer money for her services, for that would be to inform her that she was not a guest; and if he were to invite her to the White House as an artist that might provoke from her coffee, tied up in a muslin bag, and let the reply that Dickens made to the Queen when she wanted him to read before her: "I do not care to be welcomed as a reader where I should not

be welcomed as a guest." Undoubtedy it is the diva's business to sing, and to ask her to sing for nothing would be equivalent to asking her for several thousand dollars; but then is she always to be the singer and never the society lady, and must she take as half bushels) will absorb all the urine an affront an invitation that is certainly intended as an honor? Of course, it is no longer necessary for her managers to advertise her as a singer who has sung "before the crowned heads of Europe" -she has risen far above all advertising of that kind; but there was a time when she would have been delighted to please our President, and she might recall it in behalf of artists who seek that honor,

> was herself comparatively unknown. What shall our good-natured and cultured President do when he desires to give a worthy artist the encouragement which attends his recognition? Shall he affront the artist by offering her money, for fear of affronting her by extending such an invitation to her as is given his other guests?-N. Y. Graphic.

#### Half-Educated People.

James Parton addressed the evening high school of Boston last week, and said that half-educated people are often found in the highest walks of life. He himself had once found on visiting Enghave cut the toe leather. This he will land that his education was woefully deficient in many respects. When asked Through it pour medicine, and he will if such and such a flower or tree was a native of America, he could not tell. He was unable to inform his questioner are troublesome to stock, and the how much grass was cut to an acre in weather is warm enough to permit, take | America. He had not fully comprehended the fact that any grass was ever fittle water until melted, then add one ounce of carbolic acid crystals for each observed that no people had so thorpound of soap. When cool make a strong oughly separated themselves from nasuds by mixing about one and a half ture as Americans-a fact particularly pounds of the preparation in a pailful of salient when the familiarity of Eurowarm water, and wash the infected peans with country interests is considered. The value of knowledge gained wash them at intervals of five days un- from literature is overestimated, he thought. It is not the chief end of man. To write classical English is not the highest achievement. Shakspeare was not the greatest man of the Elizabethan era. Homer was not the noblest Greek. He was less than Achilles, as the herald is less than the General whose exploits he proclaims. In the first rank of aristocracy should be placed the discoverers of truth, like Newton. Next to them belong those who apply the truth to the age. - Boston Globe.

-When things get dull in Oregon some one builds a bon-fire on the crest of Mt. Hood and the telegraph reports that the supposed extinct volcano shows signs of breaking out with renewed fury.

# An Incident in Virginia,

Our old friend, Mr. Win. Claughton, of Heathsville, Sheriff of Northumberland Co., Va., says: "We have many good medicines in our parts, but nothing which equals St. Jacobs Oil, the Great Gernen Remedy. My family keep the Oil in the house at all times and use it for almost everything that a medicine can be used for. They claim that it is unequaled for rheumatism and all bodily pains. -Tappahannock (Va.) Tide Water Index.

STRANGE that we can put no confidence at all in a professional confidence man.

THE VOLTAIC BELT CO., Marshall, Mich., will send Dr. Dye's Celebrated Electro-Voltaic send Dr. Dye's Celebrated Liectro-voltate

If you would destroy the cankering worm. For any external pain, sore, wound or lameness of man or beast, use only MEXICAN MUSTANG LINI MENT. It penetrates all muscle and flesh to the very bone, expelling all inflammation, soreness and pain, and healing the diseased part as no other Liniment ever did or can. So saith the experience of two generations of sufferers, and so will you say when you have tried the "Mustang."

# DR.SANFORD'S
